

Compiler:

- ☐ Display help information
- ☐ Display version
- ☒ Verbose Output
- ☐ Log every file read
- ☐ Do not generate any file
- ☒ Treat warnings as errors
- ☐ Generate the abstract syntax tree, in .dot format (suitable for Graphviz)
- ☐ Outputs a trace file
- ☐ Display detailed duration routine computations and stack requirements
- ☒ Do not compute routine duration
- ☒ Do not compute stack requirements
- ☒ Generate also an assembly language text file (with .asm extension)
- ☒ Generate Graphviz files containing block invocation, block sorting constraints, ...
- ☒ Output a list file
- ☐ Generate output code in a C header file and C source file
- ☒ Perform code optimizations
- ☐ Uses the legacy pic18 compiler, as released in Piccolo 2.0.2
- Stop after the given number of errors has been reached (by default: 100)
- Stop after the given number of warnings has been reached (by default: 100)
- Fine tuning of optimizations (new PIC18 compiler only)

/Volumes/dev-svn/piccolo/project_xcode/build/Default/CocoaPiccolo.app/Contents/Resources/piccolo -v --Werror -I -T -S -G -L -O

Run Command Line
